Harihar Nath Mishra

Software Engineering & Delivery Leader with 25+ years specializing in stabilizing large programs, fixing execution gaps, and scaling teams during transition.

Delhi, India

Summary

Can discuss more on my Agentic AI Career Discussion chat bot

https://huggingface.co/spaces/mishrahn/career_conversation

Engineering & Technology Leader with 25+ years of experience driving end-to-end delivery of enterprise applications, cloud migrations, and digital transformation in global organizations. Proven record of leading cross-functional teams, modernizing legacy systems, and delivering high-scale, compliant, and secure platforms. Currently focused on Microservices architecture, Generative AI, Predictive AI, Retrieval-Augmented Generation (RAG), and Agentic AI, building PoCs and strategies for AI-driven enterprise transformation.

Expertise in analysing and modelling the business requirements, scoping work efforts, designing software components and architecture, transferring the knowledge to the technical team and technical mentoring

Experienced in people management including recruiting, coaching and providing constant client feedback to ensure team members are adhering to the process to meet the client expectations
Expertise in iterative, agile product development methodologies & tools; collaborating with teams across shores

Easily adaptive to constantly changing technologies and challenges posed by evolving technologies, to suit business needs

Strong believer of communicating openly, effectively and timely with the clients, management and the project teams to delegate the right work at right time to right people to ensure a smooth delivery

SKills:

End-To-End Software Solutions, Software Solution Architecture, Cloud Serverless Architecture, Generative AI, DevSecOps, Large Language Model (LLM), Retrieval-Augmented Generation (RAG), AWS, Azure, Microservices Architecture, MERN Stack, C#, ASP.net Core, Mongo DB, Python, Kubernetes, API Development, Oracle PL/SQL, SQL, GitHub Copilot, Artificial Intelligence (AI), Delivery Management, PostgreSQL, React.js, Node.js, ASP.net, Product Support, Web Application Security, ASP.net MVC, MySQL, MS SQL Server, Agile, SAFe, Waterfall, SDLC, Confluence, JIRA, Stakeholder Management, People Management, Active batch

Experience

Broadridge Advisor Solutions

Senior Technology Manager

November 2007 - June 2024 (16 years 8 months)

Hyderabad, Telangana, India

I have proven hands on proficiency in software development, Team Management, Stack Holder Management, solution architecture and the end-to-end delivery of business solutions, ensuring alignment of technology visions with organizational goals.

1. Expertise in software development, solution architecture, and delivering impactful business solutions
2. Enhancing operational efficiency with AI/ML and AWS/Azure.
3. Expert in requirement analysis, effort scoping, and technical mentoring.
4. Experienced in people management, recruitment, mentoring, and performance evaluation.
5. Skilled in Agile methodologies, iterative product development, and global team collaboration.
6. Adaptive to emerging technologies and evolving business needs.
7. Strong advocate of open and effective communication for smooth project execution.
8. Proficient in SDLC processes, audits, and ISO 9001:2008 & ISO 27001:2005 certifications.

Artech Information Systems

Project Manager

2004 - 2007 (3 years)

Education

Janardan Rai Nagar Rajasthan Vidyapeeth (JRN RVU), Udaipur
Bachelor of Technology - BTech, Computer Science
